EDUCATION

Full Stack Web Development

October 2023

The University of Texas at San Antonio, TX

Bachelor of Business Administration in Information System

December 2018

The University of Texas at San Antonio, TX

PROJECTS

Music-Verse: Developed an interactive music platform using React, GraphQL, and Node.js, allowing users to explore a diverse range of music, post reviews, rate tracks, and engage with community content, and integrated with the Spotify API, deployed on Heroku. <https://github.com/pzhong1/Music-Verse.git>

BA-travel-: BA Travel is a minimalist travel planning application that offers users streamlined flight information, driving directions, and a 5-day weather forecast, utilizing technologies like Amadeus Travel API, OpenWeatherMap, and Here API, and enhanced with JQuery, Tailwind CSS, and the HTML5 Dialog element for a seamless user experience. <https://pzhong1.github.io/BA-travel/>
